

Your Paper Title

Your Name

Course Number: Course Name

Month Day, Year

Start writing your paper here. Normal body text is 12-point Times New Roman, double-spaced, with one-inch margins in paged document formats and a half-inch first-line paragraph indent.

A standard Chicago 18 author-date citation looks like this (Smith 2024, 42).

Another source can be cited like this (Jones 2022, 220).

For a narrative citation, Smith (2024, 42) argues that the evidence supports this interpretation.

This is another paragraph so you can verify ordinary paragraph indentation and line spacing.

Contemporary Literature

This demonstrates a Level 1 heading.

What Are the Major Movements?

This demonstrates a Level 2 heading.

Beat Generation

This demonstrates a Level 3 heading.

Significant figures, events, and elements

This demonstrates a Level 4 heading.

Kerouac as the leader. The role of founding Beat Generation poet was filled by Jack Kerouac. This Level 5 heading remains run-in across the major output formats.

Block Quotation Example

Normal double-spaced body text appears before the block quotation.

This is an example of a block quotation. A prose quotation of five or more lines or more than one hundred words should be blocked. It begins on a new line, appears without quotation marks, is indented from the left margin, and is single-spaced. (Smith 2024, 50)

Normal double-spaced body text resumes here.

Conclusion

Write your conclusion here.
